Education

Bachelor of Computer Science (Honours) – Software Engineering Co-op Sept 2024 – Apr 2028
University of Windsor Windsor, ON
- **Minor:** Mathematics | **Awards:** $12,000+ Total Merit-Based Scholarships

Work Experience

Stellantis May 2026 – Present
Software Engineering Intern – Enterprise Systems Windsor, ON
- **Achieved a 77% query execution speed-up across core database modules** by implementing automated batch processing pipelines and optimizing relational table lookups via TID bucket indexing.
- **Reduced UI render wait times by 94% across high-traffic analytical views** by engineering client-side DOM caching and deploying a lazy-loading architecture for large-scale DOM trees.
- **Automated the provisioning and onboarding of 40,000+ plant workers** by engineering a scheduled cron pipeline to reliably distribute mission-critical qualification tools required for daily operational compliance.

University of Windsor – WODDLab Sept 2026 – Present
Research Database Programmer – ML/NLP Systems Windsor, ON
- **Reproducing a published DeBERTa-v3 + Graph Attention Network model for aspect sentiment triplet extraction toward a conference paper**, benchmarking F1 against thesis results with PyTorch and Hugging Face.
- **Rebuilding a BERT-based sequential e-commerce recommender (BERT-SEMSRec) for a journal submission** by re-implementing its MetaBERT2Vec and SeqBERT2Vec embedding models on Amazon Reviews 2023.

Freelance Jan 2026 – Present
Full-Stack Software Contractor Windsor, ON
- **Engineered a production e-commerce and customer loyalty platform for a commercial client** by building a responsive frontend and a **Supabase** (PostgreSQL) backend, integrating the **Square API** for secure payments.

Projects

Tether – Self-Hosted Web Terminal | Go, WebSockets, JavaScript (xterm.js), Cloudflare 2026
- **Streamed live shell sessions to multiple authenticated viewers in real time** by architecting a Go backend on WebSockets and cross-platform PTYs, with a synchronization engine that fans each session out to read-only spectators.
- **Enabled zero-config public HTTPS access and safe file sharing** by integrating Cloudflare Quick Tunnels and building an atomic (write-temp-then-rename) file transfer REST API sandboxed to a single directory.

myAdvice – Course-Advising Portal | Java (JavaFX), Spring Boot, Hibernate, MariaDB, Docker 2026
- **Cut clicks per advising workflow by ∼80% in a ground-up rebuild of the university's course-advising portal** by designing a JavaFX client over a Spring Boot REST API with Hibernate persistence on MariaDB.

Whisper Reader – Text-to-Speech Extension | JavaScript, Chrome MV3, Web Speech API 2026
- **Delivered hands-free page narration with live word-by-word highlighting and zero network requests** by building a Manifest V3 extension on the Web Speech API with an on-device reading-position store capped at 150 pages.

Leadership & Extracurricular Experience

Head of Events Mar 2026 – Present
University of Windsor Computer Science Society (CSS) Windsor, ON
- **Executed large-scale technical workshops and university-wide hackathons** by directing cross-functional teams.

Technical Skills

- **Languages:** Python, Java, C/C++, Go, JavaScript, SQL (T-SQL), HTML/CSS
- **Frameworks & Libraries:** Spring Boot, Hibernate, REST APIs, WebSockets, PyTorch, Pandas, Chart.js, xterm.js
- **Databases & Systems:** PostgreSQL, MariaDB/MySQL, Snowflake, Relational Schema Design (3NF), Linux
- **Cloud, DevOps & Tools:** Git, Docker, CI/CD Pipelines, Azure, Cloudflare, Power BI, Quickbase
